## VISUAL MANUFACTURING® IMPLEMENTATION

Because of its complexity, most companies need assistance implementing software like VISUAL Manufacturing®. Carr Enterprises specializes in helping companies like yours get the most from VISUAL™. We pride ourselves on providing the right level of support to ensure your success.

It is well known that between 30 and 50% of all ERP implementations fail. While high profile disasters such as Hershey, Volkswagen AG and Whirlpool make the news, it is smaller organizations such as yours that are at the greatest risk.

With fewer personnel and less money, small to mid-sized companies have the hardest time successfully implementing complex software

Carr Enterprises brings to your implementation the mix of skills and professionalism necessary to ensure success. Whether you are planning a new implementation, rescuing a failing one or simply want get the most from VISUAL Manufacturing®, call us.

### New VISUAL™

#### Implementations

Need assistance getting started with VISUAL™? We will help make VISUAL Manufacturing® a key part of your total business strategy.

From implementation planning and project management to answering routine questions, we will help.

### VISUAL Doctor:

#### **A House Call for your Failing Implementation**

If we only learn from failure, there are many well-educated VISUAL™ users.

Using VISUAL™ successfully requires carefully matching its capabilities to the needs of your business. Unfortunately, software vendors routinely sell complex software then blame their customers when it doesn't work correctly.

Getting the most from VISUAL Manufacturing® requires a knowledge of good business practices combined with technical mastery.

This is a mix of skills that few employees, at any company, possess.
